

Econom'o H2O2 CONSULTING

Collecting and treating rainwaters for the individuals who want to save and protect our planet.

For who ?

The Econom'o process is directed to individuals who want to replace the use of clean water by the use of treated rainwater.

Why ?

- Cutting your clean water bill and water consumption,
- Helping to protect our planet's resources.

How ?

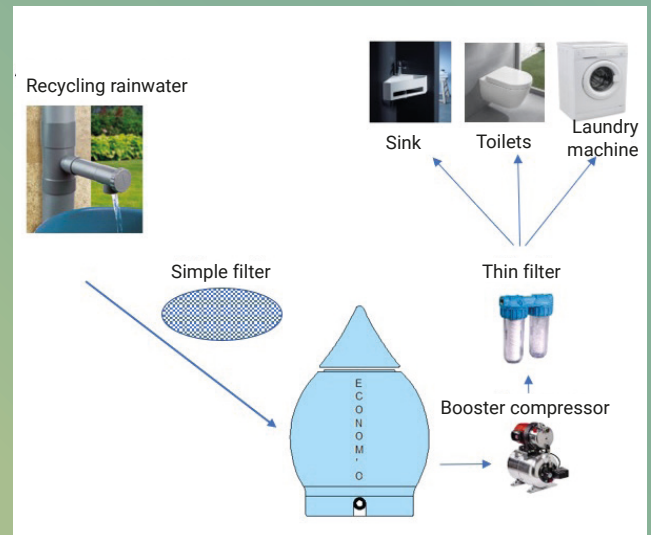

The Econom'o system integrates one or several backlighted 800 liters « water drop shaped » tanks and a combined electrolyse system with UV radiation.

GOOD TO KNOW
