

Otonom'O

H2O2 CONSULTING

The Otonom'O device is the first concept developed by H2O2 CONSULTING to treat and disinfect the surface water.

For who ?

Otonom'o is intended to local authorities and agro-food industries

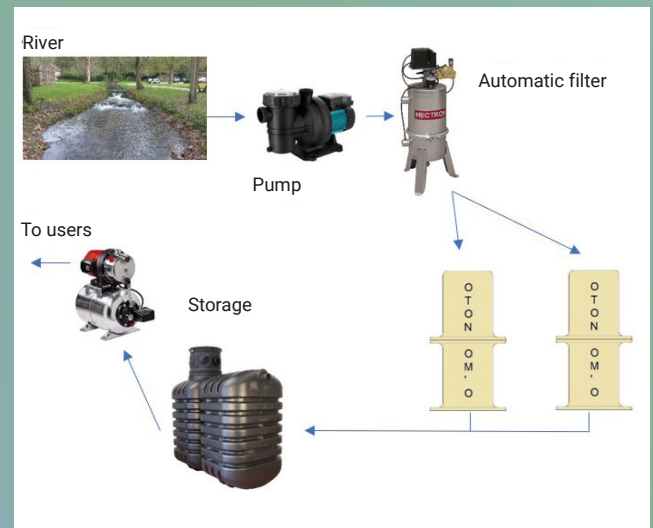

Why ?

- When there is no clean water feed or a financial unavailability,
- To free from the chlorinated disinfection products in industry.

How ?

The bactericidal power of the radiation combined to the power of the water electrochemistry allows to treat the main known pollutants.

THE CONCEPT

THE RULES

The equipments are conform to the current recommendations and regulations about using cleaned surface water.

EXAMPLES OF USE

- Water supply for public sweepers,
- Clean water supply to an Army base,
- Discoloration of jeans' washing water (Morocco),
- Rainwater treatment from an airport to supply the restrooms.

GOOD TO KNOW

Our mobile units intervene at you home with treatment ad hoc services.
